

Kurhade Varun Vijay

Generative AI & Agentic AI Engineer

kurhadevarun3@gmail.com — +91 9356022799 — linkedin.com/in/varun-kurhade-b53310281
github.com/Varunkurhade1674 — portfolio-sigma-lilac-52.vercel.app

Objective

Generative AI / Agentic AI Engineer building multi-agent systems, RAG pipelines, and LLM-powered applications using LangChain, LangGraph, and prompt engineering. Full-stack foundation to ship production-ready AI systems end to end – still learning, always building. Open to full-time and internship roles across startups and established companies.

Projects

AuditFlow – AI-Powered Multi-Agent Document Auditing System (Agentic AI) *Python, Streamlit, Groq Llama 3.3, Multi-Agent AI, Prompt Engineering, PDF Processing*

- **Problem:** Manual auditing of business, legal, and compliance documents is time-consuming and prone to human errors.
- **Solution:** Built a Multi-Agent AI system that automates document auditing, risk analysis, and audit report generation using specialized AI agents.
- **GitHub:** github.com/Varunkurhade1674/Multi-Agent-AuditFlow

Krishi Mitra – AI-Powered Agriculture Assistant *Python, Flask, Groq Llama 3.1, Gemini Vision, Speech Processing, Computer Vision, Prompt Engineering*

- **Problem:** Farmers often struggle to identify crop diseases and obtain timely agricultural guidance due to limited access to expert support.
- **Solution:** Developed a multimodal AI assistant that enables farmers to interact through text, voice, and images, providing crop disease detection and AI-powered agricultural recommendations.
- **GitHub:** github.com/Varunkurhade1674/KrishiMitra-Agriculture-Assistant

MediConsensus – Multi-Agent Medical Diagnostics Platform (Agentic AI) *Python, FastAPI, Groq Llama 3.3, Octochains, Multi-Agent AI, Prompt Engineering*

- **Problem:** Medical diagnosis often requires opinions from multiple specialists, making the process time-consuming and difficult to coordinate.
- **Solution:** Built a Multi-Agent AI platform where specialist AI agents collaborate to generate consensus-based diagnostic reports for improved clinical decision support.
- **GitHub:** github.com/Varunkurhade1674/MediConsensus-Collaborative-Medical-Diagnostics-Platform

NarraSpeech AI – Image-to-Story-to-Speech Generator *Python, Streamlit, BLIP, Llama 3, Text-to-Speech (TTS), Multimodal AI*

- **Problem:** Converting images into engaging stories with natural voice narration typically requires multiple manual tools.
- **Solution:** Developed a multimodal AI application that automatically generates image captions, creates contextual stories, and converts them into speech.
- **GitHub:** github.com/Varunkurhade1674/NarraSpeech-AI

VectorMind AI – Enterprise RAG Assistant *Python, Streamlit, LangChain, Google Gemini, ChromaDB, RAG, Vector Embeddings*

- **Problem:** Organizations require fast and accurate retrieval of information from large collections of enterprise documents.
- **Solution:** Built a Retrieval-Augmented Generation (RAG) assistant supporting semantic search, contextual question answering, document comparison, and summarization.
- **GitHub:** github.com/Varunkurhade1674/VectorMind-AI-Enterprise-RAG-Assistant-Generative-AI-RAG-

SQLMind AI – Enterprise Text-to-SQL Platform *Python, FastAPI, React, PostgreSQL, Ollama, Llama 3, Prompt Engineering*

- **Problem:** Business users often lack SQL knowledge, making database querying difficult.
- **Solution:** Developed an AI-powered platform that converts natural language into executable SQL queries with an interactive interface for query execution and visualization.
- **GitHub:** github.com/Varunkurhade1674/SQLMind-AI—Natural-Language-to-SQL-Intelligence-Platform

IntelliDocs AI – Multi-Agent Document Intelligence Platform *Python, LangGraph, LangChain, FAISS, Streamlit, Gemini, RAG, Multi-Agent AI*

- **Problem:** Searching and understanding information across multiple document formats is time-consuming and inefficient.
- **Solution:** Developed a Multi-Agent RAG platform that performs semantic document search, contextual question answering, summarization, and response verification with citation support.
- **GitHub:** github.com/Varunkurhade1674/IntelliDocs-AI-Document-Intelligence-Hub

SupplyChain AI – Multi-Agent Crisis Resolution Platform *Python, LangGraph, LangChain, FastAPI, Streamlit, FAISS, RAG, Multi-Agent AI*

- **Problem:** Supply chain disruptions require rapid coordination across inventory, logistics, finance, and risk management teams.
- **Solution:** Built a Multi-Agent AI platform that automates disruption analysis, document retrieval, decision-making, and executive report generation.
- **GitHub:** Repository Link

Skills

Programming Languages:	JavaScript, Python
Frontend:	HTML, CSS, Bootstrap, EJS, React
Backend:	Node.js, Express.js, RESTful APIs
Databases:	MongoDB, SQL, Firebase
AI & Emerging Tech:	Generative AI, Agentic AI, AI Agents
Automation & Tools:	Git, GitHub, VS Code
Soft Skills:	Teamwork, Problem Solving, Communication

Education

Jain College of Engineering and Research Belagavi	2022 – 2026
<i>B.E. in Computer Science and Engineering – CGPA: 8.12</i>	<i>Belagavi, Karnataka</i>
JA PU College Athani	2021 – 2022
<i>Pre-University – Percentage: 77.8%</i>	<i>Athani, Karnataka</i>

Certifications & Achievements

- Participated in CODEFIESTA National Hackathon Lakshmeshwar, India.
- Participated in the State Level Project Competition at Bangalore Institute of technology, Bengaluru.
